Partner

## Services Provided

MARKET TREND<sup>SM</sup> Advisors (MTA) provides both investment advisory services and money management in the form of individually managed accounts.

## Our Investment Philosophy

Our investment philosophy in managing assets for our clients is the preservation of capital and achievement of above-market performance with below-market risks. Since inception, MTA has applied disciplined quantitative approaches and sound money management to achieving these objectives, including the use of unemotional, model-driven investment strategies which reduce market risk by avoiding or exploiting market downturns and/or by rotating from weak investment sectors to stronger ones. Risk and costs are further reduced by the inherent diversification and flexibility of the index ETFs in which we specialize.

## Our Clients

We offer portfolio management and advisory services primarily to individual investors, but also serve investment professionals, small businesses, pensions, trusts, charitable organizations, and corporations.

## Managed Account Administration

Each client has his or her own brokerage account(s) and grants us authorization to enable discretionary transactions. Clients continue to receive confirmations and monthly statements from their broker. In addition, we will provide quarterly portfolio reviews and performance reports.

## Managed Accounts

In establishing a managed account with MTA, an initial consultation is conducted with each client to discuss personal investment objectives and constraints. In addition, we review each client's level of risk tolerance and degree of aggressiveness or conservatism. From these inputs an investor profile emerges and an investment strategy is crafted.

## Fee Schedule

### **MTA Index, World Index, Sector, Alta Vista and Balanced Portfolio accounts:**

Fees are 1.8% per annum of the first \$1 million. For amounts above \$1 million, fees are reduced to 1.3%

## Investment Strategies Offered

### **MTA Index Investment Service:**

Model-driven long and short service investing in broad indexes through ETFs, mutual funds, and/or options. Service can easily be modified to suit investor's desired level of aggressiveness through various leveraging tools.

### **MTA World Index Investment Service:**

A model-driven long and short service investing in the strongest country-specific ETFs when long and broad market ETFs when short. This is a moderately aggressive service.

### **MTA Sector Investment Service:**

Invests in 10 of the best performing industry and international sectors to achieve above market gains while minimizing losses during market downtrends. This is a moderate strategy that may go short in weak markets.

### **MTA Alta Vista Investment Service:**

This trend-following global tactical asset allocation strategy invests in stocks, bonds, commodities, and real estate with an additional rotating "go-anywhere" allocation that dynamically adjusts to markets and sectors showing relative strength.

### **MTA Balanced Portfolio Investment Service:**

Applies our trend-following methods to a traditional asset allocation strategy for a very low volatility conservative result. Can be short during down markets.

### **MTA Income Investment Service:**

This discretionary strategy aims to deliver current income with low volatility. Can be in cash during down markets.

### **MTA Turbo Trading Investment Service:**

This is an active trading system for aggressive investors based on the **TimingCube Turbo Model**.
