

***TimingCube* MANAGEMENT**

Dr. Serge Dacic Executive Vice President and Co-Founder

As Executive Vice President and Co-Founder of *TimingCube*, Serge is responsible for strategy and day-to-day operations of the company as well as its information technology infrastructure.

Serge brings more than 14 years of software engineering and corporate expertise to *TimingCube*. His career includes a wide spectrum of technical and management positions in companies ranging from startups to Fortune 500 corporations.

The four years prior to founding *TimingCube*, Serge served as Chief Technology Officer for two separate start-up firms focused on Internet security and online collaboration.

Before that, Serge was a senior executive with Schlumberger, a global oil and information services firm. During his 9 years at Schlumberger, Serge oversaw multiple research and development projects in Europe and the U.S.

In his spare time, Serge studied investing and the markets. This interest, combined with his computer science background, led Serge to a collaboration with Frank Minssieux on a new type of market timing. The model Serge and Frank designed emphasized long-term investing and relatively little trading.

The promise of their model induced Serge and Frank to found Fraser Partners LLC and eventually offer the *TimingCube* service in September 2001.

Dr. Serge Dacic received his Ph.D. in Computer Science focusing on Artificial Intelligence as it applies to image processing and adaptative systems from Paris XI University, France. During his tenure at Paris XI, he taught graduate computer science courses on User Interface Design, Usability and Software Ergonomics.
